

**Real PC-Based  
Punching**

***Save Time with a Simple and Affordable Payroll Timekeeping Solution!***

**WebClock offers the ease of clocking in and out through a standard web browser. With no software to install and no hardware to maintain, tracking your employee's punches in real-time has never been more simple.**

**WebClock also enables employees to check their time card and/or schedule over the web. Supervisors benefit from the convenience of online access for editing employee time cards from any web-enabled workstation.**

***Employee Online Access***

With WebClock, employees can:

- Clock in or out and record punch times from any authorized computer or mobile device with a standard web browser
- View their time card and/or a schedule, allowing them to be more aware and accountable for their labor hours

***User Experience***

In only seconds, punches are:

- Recorded from one or more authorized workstation
- Immediately sent to the web for real-time administration and reporting

Plus, employees can report "tips," a "department," and other related punch data gathered through employee clock prompts.

***Security***

Employee punches are convenient and secure.

- Restrict employee punches to only authorized workstations through an IP Address filter
- Protect employees by clearing user credentials between punches
- Data flow is secured by Secure Socket Layer (SSL) technology
