

# FRIENDLY POST

A special note from Friendly the Eagle | July 2016

## CHECKING VS. SAVINGS CHALLENGE!

Do you know the difference between a checking and a savings account? A checking account is used for every-day needs, like groceries, clothes and bills. A savings account is used to save for larger purchases, like a car or vacation.

Test your knowledge by circling which account you would use to buy the items below:

- |                         |                    |                      |                    |
|-------------------------|--------------------|----------------------|--------------------|
| 1. Going to the movies: | Checking / Savings | 6. School supplies:  | Checking / Savings |
| 2. Groceries:           | Checking / Savings | 7. New car:          | Checking / Savings |
| 3. New shoes:           | Checking / Savings | 8. Going to college: | Checking / Savings |
| 4. Family vacation:     | Checking / Savings | 9. A house:          | Checking / Savings |
| 5. Phone bill:          | Checking / Savings | 10. Ice cream:       | Checking / Savings |

Answers: 1. Checking, 2. Checking, 3. Checking, 4. Savings, 5. Checking, 6. Checking, 7. Savings, 8. Savings, 9. Savings, 10. Checking

## HOW TO MAKE ICE CREAM

3 cups heavy cream    1 cup whole milk    3/4 cup sugar    1 TBSP pure vanilla extract    Kosher salt    5 large egg yolks

Special equipment: An ice cream maker and a candy or instant-read thermometer

- Whisk the cream, milk, sugar, vanilla and 1/2 tsp salt in a medium saucepan and bring to a simmer over medium heat.
- Beat the egg yolks in a medium bowl. Slowly whisk 1 cup of the hot cream mixture into the beaten yolks, then pour back into the saucepan, whisking, and return to medium heat. Cook, stirring constantly with a wooden spoon, until the mixture thickens, coats the spoon and reaches 180 degrees F on a thermometer, 6 to 8 min.
- Remove from the heat and strain the custard through a fine-mesh sieve into a large bowl or measuring cup; discard the solids. Stir often until the mixture cools to room temperature.
- Lightly press plastic wrap directly against the surface of the custard to prevent a skin from forming. Chill until cold, about 3 hours. (For faster chilling, set the bowl of custard in a bowl of ice water and stir until cold.)
- Freeze the mixture in an ice cream machine according to the manufacturer's instructions. (Do not over-churn or it can have a grainy texture.) Place the ice cream in the freezer to set up for at least 1 hour, then serve.
